

Ohio State Stationary Engineering 126 Hour Approved Course

OMCSI OHIO STATE STATIONARY ENGINEERING 126 HOUR TRAINING COURSE

The O&M Consulting Services Inc, Ohio State Stationary Engineering 126 Hour Approved Course is presented in a setting that allows you to work and attend the necessary time requirement to set for the Stationary Engineers Exam.

The course is presented in four hours every Tuesday and Thursday starting December 5, 2007 with graduation on April 4, 2008.

The course is designed for 8 hours a week with flexible training times especially designed for shift workers. OMCSI has a morning four hour training session, an afternoon four hour training session and an evening four hour training session. You may attend anyone during that day. The subject mater is repeated that day to ensure the shift worker can attend without work interruption or using comp time to attend.

Upon completion of this course, OMCSI will help you fill out your application to set for the State of Ohio Stationary Engineer Examination.

Simple Ways OMCSI Can Save You Money!

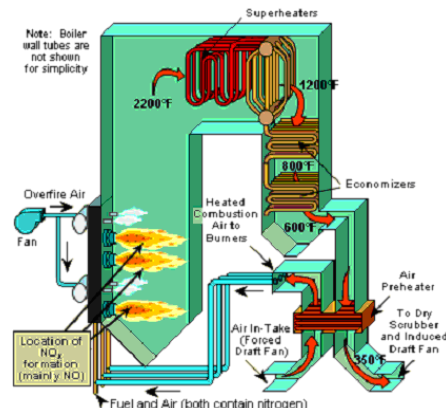

We purchase the course materials listed by the State of Ohio and include this cost in our course fees.

During the course OMCSI will present you with handout materials that can only be obtained by participating in this course. These materials are specific to your studies and presented to you at no additional cost just for attending our course.

OMCSI will help if needed secure a low interest loan. For course fees, or personal computer used for internet correspondence, practices, and chapter test questions practice.

By making class times flexible, you do not use comp time. If needed, you can work times out that a sitter may be available for your children or work time.

Once started in the class you will have access to all the OMCSI Distance Learning Modules.

OMCSI Instructors

All OMCSI instructors carry Ohio State Stationary Engineers Licensed, as well as the American Society of Power

OMCSI instructors have utilities backgrounds where they instructed or trained the operators for their Stationary Engineers Licenses in the State of Ohio,

OMCSI instructors have years of experience instructing Stationary Engineers and they are committed to safety, environment and improving the professional standards of Power Engineering.
