

OP-22 High Pressure Boiler 3-Day Seminar

Cost: \$650.00 includes all seminar fees and student text. (For on-site, call us for price quotes)

Intended Audience: Operators, Maintenance Technicians and Management

This 3-day High Pressure Boiler Seminar is geared to maximize efficiency, safety and performance.

If you're responsible for the day-to-day operation or maintenance of your company's High Pressure Boilers then OMCSI High Pressure Boiler Training is the best way to get the most out of your equipment investment, training budget, maximized efficiency, safety and performance.

High-pressure boiler operators use high-pressure stationary steam boilers and auxiliary steam equipment such as pumps or compressors to supply steam heat for office buildings, industrial and process steam. In some cases they operate equipment that supplies compressed air for pneumatic tools and hoists used in a production process. Some boiler operators also operate and maintain HVAC systems. Operators control combustion, monitor instrumentation, monitor unit performance, adjust controls, monitor environmental equipment, operate auxiliary equipment boilers, test water, and operate water treatment equipment. When boilers are not working properly, boiler operators may be required to perform maintenance to equipment.

From this 3-day High Pressure Boiler Seminar, you will be able to reduce energy costs, reduce maintenance headaches, and increase production profits! You will understand how all types of steam system components work and how to apply them to optimize the performance of your high-pressure boiler.

This seminar is instructed by an American Society of Power Engineers Licensed Technical Instructor. These instructors must be seasoned instructors and maintain their credentials to carry this esteemed license.

Seminar Outline:

- Steam Boiler
- Steam Boiler Fittings and Accessories
- Basic Boiler Room System
- Steam and Water Accessories
- Fuel Burning Equipment
- Draft System
- Combustion Controls
- Instruments
- Boiler Water Treatment
- Steam Boiler Operations
- Environmental Regulations and Equipment

ASOPE Facility Operating License testing is available at the end of this course for qualified individuals by request only.
