# OP50 HVAC Chiller 1-Day Seminar

**Cost:** \$250.00 includes all seminar fees and student text (For on-site, call us for price quotes).

**Prerequisites:** None.

**Intended Audience:** Maintenance, Operators, Technicians, and Management and one attending school for Facility Maintenance Certification

If you're responsible for the day-to-day operation or maintenance of your company's HVAC Chiller System is the best way to get the most out of your equipment investment, training budget, maximized efficiency, safety and performance.

This OMCSI seminar covers all aspects of the HVAC Chiller Systems. Topics to be covered are specifically designed for HVAC and building maintenances technicians. The seminar also includes an introduction to HVAC fundamentals, troubleshooting, and servicing procedures.

The main focus of the seminar is the HVAC Chiller Systems and types of Chillers. You will understand how all types of HVAC Chiller components work and how to apply them to optimize the performance of your HVAC System.

**This seminar is instructed by an American Society of Power Engineers Licensed Technical Instructor. These instructors must be seasoned instructors and maintain their credentials to carry this esteemed license.**

**Seminar Outline:**

- Comfort
- Safety
- Thermodynamic and heat
- Combustion and Fuels
- Chiller Types
- Control Systems
- Heating and Control Loads
- Distribution System Balance

**ASOPE Facility Operating Class License testing is available at the end of this course for qualified individuals by request only.**
