OP52 Technical Certification for Refrigerants 1-Day Seminar

Cost: \$275.00 includes all seminar fees and student text (For on-site, call us for price quotes).

Prerequisites: None.

Intended Audience: Any one requesting Universal certification

The OMCSI Technical Certification for Refrigerants Preparatory Seminar provides an overview of the latest information on safe and efficient storage, transportation, and usage of refrigerants. This seminar addresses the latest EPA regulation and their implications, and the new HFC and PFC refrigerants.

Information included in this seminar on recovery, recycling, and reclaiming of refrigerants for all types of air condition and refrigeration systems.

During the seminar ample refrigerant certification test questions and test administration information are included to help prepare the technicians to pass the EPA Section 608 Certification Test. All aspects of refrigerants will be discussed.

This course is instructed by an ARA EPA Chief Instructor and Examiner. If the students would like to set for the EPA Section 608 Certification Test, he or she may do so the following day after the seminar. (Please note application must be filled out prior to the class to set for the exam).

Seminar Outline:

- Refrigeration Principles
- Safety
- Refrigerants Oils
- Regulatory Requirement
- Recovery, Recycling, and Reclaiming
- Service Practices
- Core Certification Test Questions Practices
- Type I (Small Appliances)
- Type II (Small Appliances) Certification Practices Test Questions
- Type II (High-Pressure Equipment)
- Type II (High-Pressure Equipment) Certification Practices Test Questions
- Type III (Low –Pressure Equipment)
- Type III (Low –Pressure Equipment) Certification Practices Test Questions
- Universal Certification
- Universal Certification Practices Test Questions
